***To whom it may concern***

***Subject: COVID-19 Extention of certification validity***

Due to unprecedented uncertainties brought on by COVID-19, EuCertPlast is taking action to reduce the pandemic's burden on the industry. The following measure aims to minimise the disruptions in the market, by allowing those companies whose EuCertPlast certificates expire during the months of the outbreak to continue benefiting from the Certification.

Therefore, EuCertPlast establishes the following:

- All EuCertPlast certificates with the validity date expiring between 20th of February and 30th June 2020 will be automatically extended for a period of 3 months.

This procedure will only apply to monitoring audits. Certified companies with changes in the recycling process will be excluded and a monitoring audit will have to be scheduled at the earliest convenience. Please contact EuCertPlast.

Certification for any new companies will have to be postponed.

If you have any questions, please contact [info@eucertplast.eu](mailto:info@eucertplast.eu)
